缝制范围：300x200mm / 350x250mm

冲缝机

PATTERN SEWING MACHINE WITH HOLE PUNCHING FUNCTION

传统工艺需要两个人去做，车缝部分跟冲孔部分，需要买专门的冲孔机，且拿成品去冲，效率低下，因为跟车缝不共用模板，位置容易搞偏；自动化设备整合两道工序，可以先车缝后冲孔，先冲孔后车缝都可以，共用一块模板，一气呵成。

Traditional production's process need two workers do this working for sewing and hole punching, which need to buy special hole punching machine, take the finished products to be punched, the effect is lower, which couldn't be used the same mould, the position will be easy to be moved; full automatic sewing equipment can do the above 2 process by one time, which you can sew process firstly ,then do hole punching process ,or which you can do hole punching process firstly , then do sewing process. Two process only need one mould.

规格

SPECIFICATIONS

单针平缝
最高缝纫速度：2700rpm
最高冲孔速度：1000rpm
电源：单相220V
气压：0.5Mpa 1.8L/min

Single needle lockstitch
The highest sewing speed :2700rpm
The highest punching speed:1000rpm
Power supply: single phase 220v
Air pressure:0.5Mpa 1.8L/min
